

Extend the
Miracle of *Life*

Give Back by Giving Tissue

Tissue Procurement with Burst Biologics

Just one tissue donor
can help several patients
enjoy healthier lives.

Giving back to your Community

The emerging field of regenerative medicine is possible because of donations. Birthing tissue and umbilical cord blood (UCB) are full of brand-new cells and signaling molecules.

When processed and administered properly, UCB can save lives and restore functionality in countless patients.

By providing us with much-needed tissue,
you're helping people give back,
while learning all about

Burst Biologics is partnering with hospitals as part of our efforts to advance regenerative medicine. Our relationship with you will enable us to collect tissue for innovative medical research and development.

We rely on these tissues for our versatile range of biologic products, which physicians currently use to help their patients regenerate bone, cartilage, soft tissue, and more.

Giving back to Science

Our mission is to harness the power of biology.

By partnering with us, you're supporting our efforts to make meaningful progress in the fields of science and medicine.

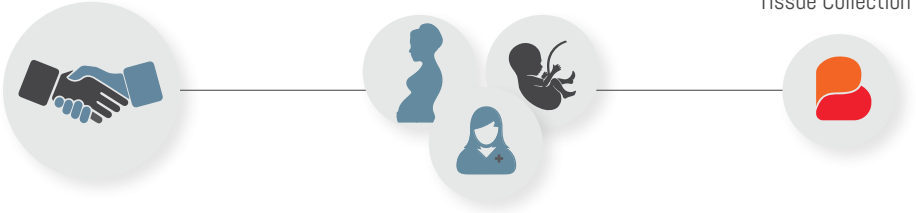

Burst Biologics is committed to creating innovative medical solutions that transform people's lives.

regenerative medicine
and the good it can do.

The Procurement Process

Tissue Collection

Partnership

Our procurement department works with hospitals to make sure every donor's information is securely collected. We also conduct thorough testing of every donor sample to ensure safety and efficacy.

The hospital nursing staff shares tissue donation opportunity with an expecting mother. Once her healthy baby is born, Burst Biologics facilitates the collection of birthing tissue.

Patients who receive our product can experience **improved functionality, reduced pain, and an enhanced quality of life.**
