

Who We Are

# HARNESSING the Power of

# BIOLOGY

## Who We Are

Burst Biologics is a medical research and biotechnology company developing groundbreaking regenerative medicine products.

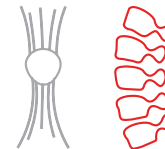

As a science-driven company, Burst Biologics believes the future of healthcare is in **harnessing the power of biology**. We've found that when research comes first, impactful products follow.

Through our innovative studies and an ever-expanding suite of regenerative medicine products, Burst Biologics is uncovering opportunities within biotechnology to transform people's lives.

## Powered by Research

Burst Biologics values the opportunity to push boundaries and move the field of medicine forward.

That's why we employ a staff of Ph.D. research scientists who are pioneering several exciting areas of research in regenerative medicine:

Soft Tissue/Ligament  
and Musculoskeletal

Central Nervous  
System

Autoimmune Diseases  
and Immuno-oncology

Through our scientists' research efforts, we're opening the door to brand-new discoveries that could revolutionize healthcare!

# End-to-End Control

Burst Biologics stands apart from most companies in the regenerative medicine space because we manage every stage of the process in-house, from research and development to production and distribution.

## RESEARCH

Our staff of Ph.D. research scientists is continuously delving deeper into the science behind regenerative medicine. By gaining a better understanding of how these processes work, we can deliver the **most impactful products possible**.

## DEVELOPMENT

Burst's cutting-edge research paves the way for innovative products to be developed in-house. We can channel everything that we learn in our research to **create unique regenerative medicine therapies** for a range of applications and microenvironments.

## MANUFACTURING

Our production team utilizes exclusive manufacturing processes to create safe and effective products with **minimum variability**. This consistency is essential in supporting **reliable patient outcomes**.

## DISTRIBUTION

The Burst Biologics sales team consists of **industry-leading experts** who don't just sell. With a commitment to education, they also share the science behind our products and the field of regenerative medicine as well.

By maintaining tight control, we can create consistent products that are validated by research and refined through exclusive processing methodologies.

## Taking Safety Seriously

At Burst Biologics, we're serious about patient safety. That's why we've developed a data safety monitoring board (DSMB) to oversee our production process. We employ medical directors who oversee all product processing.

## Passing the Test

Testing is essential to ensure product integrity and efficacy. We conduct safety screening for every product lot, including a disease panel for viruses and aerobic and anaerobic bacteria.

As a federally-registered tissue bank, Burst Biologics not only meets, but exceeds FDA standards. We utilize the highest grade plastics and USP grade reagents. We also make our products free of DMSO and other harmful additives.

With our unwavering commitment to patient health, we are setting the standard for product safety in the regenerative medicine space.

## What's Next?

As we endeavor to push the envelope in regenerative medicine, Burst Biologics has the resources and the team to leave our mark on one of the most exciting frontiers in medicine.
